

HANSA WORLDS 2016

LIBERTY WEIGHT EQUALISATION

Liberty Weight Equalisation will be in accordance with Class Rules C 5.

Sailors will be weighed in dry clothing wearing sailing clothing appropriate to the conditions and personal floatation device including any necessary equipment for an individual sailor, such as ventilators, respirators, and batteries for any servo assist control system.

Sailors who can stand on normal domestic scales will be weighed in the sail measuring area.

Sailors who cannot stand are to bring their own support slings and will be weighed at the crane.

The Weight of Liberty sailors will **not** be published.

The weight of PFD, appropriate sailing clothing and necessary equipment will be weighed.

Sailors who refuse to be weighed at the regatta will be assumed to have the weight of the lightest sailor.

Exceptionally, sailors may bring a recent dated statement of their weight in normal clothing from a doctor, hospital or clinic.

The additional weights for each Liberty will be displayed on the Official Regatta Notice board and weight packages for each boat will be prepared. The weight is to be placed under the seat.
